DRUMMOND WILLOW

Common Name: 'Curlew' Drummond Willow

Scientific Name: *Salix drummondiana*

Description: 'Curlew' Drummond Willow grows as a medium sized spreading shrub. It can grow 6' to 15' tall, spreading over 15 feet wide. Its leaves are elliptical with a pointed tip. They are light green on top with a silvery pubescence coating the lower surface. The younger stems are strikingly yellow, making them noticeable in winter. Drummond Willow is well suited for streamside and wetland restoration, wildlife habitat improvement, erosion control, and shelterbelts.

Adaptability: Drummond Willow is suited to lower and mid-elevation areas of Eastern Washington, Oregon, and Northern Idaho. It is tolerant of a wide variety of soils and drainage's, providing sufficient moisture is present.
