

WASHINGTON ASSOCIATION OF CONSERVATION DISTRICTS

Resolution No. 2018-11

Title: Allow Programmatic Funding in Commission's Natural Resource Investment

Problem: Washington State Conservation Commission's Natural Resource Investment funding only allows funding of single projects per application. Funding multiple repetitive style projects such as alternative watering for livestock, composting facilities, gutter systems, Firewise type projects, and more allow a CD to build a program that can help multiple landowners versus a single large project.

Recommendation: WACD shall work with the Conservation Commission and interested Washington conservation districts to develop criteria for programmatic applications for the Commission's Natural Resource Investment funds.

Presented by: Okanogan Conservation District

Approved by the North Central Area Association on 10/16/18
Referred to the Legislative, Bylaws, and District Policies Committee
Recommended DO PASS on 11/26/18
Adopted on 11/28/18
